

Fraud line contact note

Field	Value	Field	Value
Call reference	CALL-53042-20260813	Duration	24 minutes
Started	13 Aug 2026, 11:30	Channel	Neighbour's phone to 24-hour fraud line
Customer	Thabo Mokoena	Case reference	VIYA-FNB-CF-53042
Card	ending 9188 / token held in system	Language	English

Customer's account

Mr Mokoena said his mobile showed **No Service** from about 09:22. He noticed at about 09:30 and assumed it was another network problem because there had been an outage the previous week. At 11:05 he connected the handset to home WiFi and banking app notifications and emails arrived.

He walked to a neighbour's home and borrowed a phone. He disputes a R48,750 payment shown as MEGATECH*DIR ZA and a R95,000 transfer to T MOKOENA SAVINGS at Counterparty Bank A. He did not dispute the later declined R60,000 transfer. He said he has never bought from MEGATECH DIRECT and the Counterparty Bank A account is not his.

He said nobody phoned, messaged or visited him about banking, and he did not give a password, PIN, OTP, card detail or identity information to anyone. He had not visited a Mobile Network Operator A store that morning and did not request a SIM replacement.

Care and vulnerability note

Customer was audibly distressed and asked several times whether his pension savings were gone. During the call he disclosed a heart condition. He said he lives alone and that his son, who normally helps him with the banking app, is overseas. The agent slowed the conversation, repeated the two disputed amounts, and confirmed that the customer wished to continue.

Actions recorded during the call

Action	Record
Card	Visa debit card ending 9188 blocked
Digital profile	Profile locked
Beneficiaries	Beneficiary use suspended pending review
Customer contact	Return call requested by telephone; no SMS reliance while mobile service is unavailable
