Card	ending 7314 / token held in system	Case	created at end of call

Agent's running note

20:38 - cust calling re 2 card txns not his. ID checks completed using call-centre process. Caller from reg mobile. Says phone is working normally.

Had used card this afternoon + expecting a delivery. At about 19:42 got SMS saying 'FNB: Card ending 7314 blocked - suspicious activity. Reactivate now: fnb-secure-verify.co.za'. Says it landed in same SMS conversation as older FNB alerts so looked genuine.

Opened link around 19:47. Page looked like FNB. Entered card number, expiry and CVV. Clear that he did NOT enter app user name, app password or PIN. Was not asked to approve anything in app. No OTP mentioned.

Alert messages came through later for TECHZONE*ONL DBN ZA R12,400 and GHUB*DIGITAL ZA R31,900. Also sees an attempted R28,000 which shows declined. Customer disputes the first 2 only. Has never bought from either merchant. Says no electronics/digital-games order or delivery expected from them.

Customer first noticed alerts at about 20:33. Called us 20:38. Card blocked during call at 20:56; replacement ordered 21:01. Advised that system events still require review before any further account-access or profile-containment decision. Asked customer not to revisit link and to keep the SMS.

Customer calm, understands process. No health, age, distress, communication-support or isolation concern raised on call. English preferred. Requested update within 24 hours.

No funds-transfer, beneficiary or app-login complaint. No other transaction disputed. Case passed to fraud review at 21:02.

Customer statements captured

Question	Recorded answer
Did you make or authorise TECHZONE ONLINE R12,400?	No
Did you make or authorise GAMEHUB DIGITAL R31,900?	No
Do you dispute the declined R28,000 attempt?	No - it did not debit the account
What did you enter on the website?	Card number, expiry date and CVV
What did you not provide?	App username, password and PIN
Is your phone/SIM working?	Yes - calls and messages working normally

Synthetic evidence note. This file records what the caller and agent said; it does not classify the fraud, decide liability, select a recovery route or determine a regulatory obligation.
